### **Trekking in**

### The gorges de l'Ardèche 4 to 7 days

Located south of department, benefiting from an exceptional microclimate (more than 300 days of sunshine per year); Gorges de l'Ardèche are magical and unique for their wild beauty and grandeur. The river has carved unto the limestone, over time, a deep canyon that is discovered through natural lookouts on the GR4 hiking trail.

**In prehistoric times**, its many caverns and caves were a haven for the Cro-Magnon, as evidenced by the discovery in 1994 of the Chauvet cave rupestre art (the oldest know to date –30,000 years)

In the last century, production of charcoal from oak was very active, herds of goats and many sheeps, Gorges were overexploited, ecosystem it was threatened.

**Today**, the forest has reclaimed its, fauna and flora of the Mediterranean are again rich and varied. The orchids bloom in spring or eagles flying over the cliffs are the jewels of a magnificent fragile heritage and I hope you could come to see this site listed as a nature reserve since 1980.
